

## Bike wheels

For the actual bike tyres please use a light grey.

Chain st 6 then join to make a circle

Into the centre of the circle crochet 14 half trebles and join circle

Into those 14, half treble twice into each one, ending with 28(ish)

For the next row, 1 half treble, then chain 1, repeat this all the way round increasing to around 56-60(ish) sts, this complete the central section

Once you have completed the 3rd round, for the wheel spokes, chain out    sts, then half treble back down to the centre.

Half treble for two sts then chain out again and half treble back.

Continue this till you have completed spokes all round the circle, once done break yarn and secure end.

Once this is done we need to make the inner rim of the tyre, pick up the end of one of the spokes, chain for 8-10 sts then join the next one in, continue all round till the circle is complete.

If you are finding that your spokes are too close together or too far apart either increase or decrease the number of chain stitches between spokes.

Now for the bike tyre, if you are crocheting one for the actual bikes then please use either black or very dark grey

Please continue in the same style as the inner circle and complete 3 rounds.

Don't worry if it is a little wiggly as this will block out.

We have 6 actual bike we need pairs of tyre for

1. wheel radius 15cm spokes should be 12cm long
2. wheel radius 20cm spokes should be 17cm long
3. wheel radius 20cm spokes should be 17cm long
4. wheel radius 30 cm spokes should be 26cm long
5. wheel radius 30cm spokes should be 26cm long
6. wheel radius 35 cm spokes should be 30cm long

please measure your tension for spoke sts

we also need multiple bike wheels for a more colourful display.

These can be any size and any colour
